Diameter: 150 mm
Roll length: 50 m
32 rolls / pallet

A very flexible guard supplied in rolls allowing customization of height required at site.

Ideal for offering protection and training of young vines.

Colour: Black

Your Future Flexible Partner For Tree Protection

EXPO-NET Tree Guards

EXPO-NET Danmark A/S has a broad range of Tree Guards designed to protect young trees and shrubs.

The Guards offer protection from animals ranging from rabbits to deer. All our nets allow air to circulate freely and do not block light from the young vulnerable trees. This encourages good healthy growth, green leaves and strong bark.

The Guards are available in a range of colours and are all UV stabilised. EXPO-NET Tree Guards offer a visually pleasing solution.

Product Life

The life span of an EXPO-NET Tree Guard is very much dependent on the climate in which the Guard is situated; however we would expect all our Tree Guards to last a minimum of 5 years after which they will start to naturally degrade.

Our products come in 3 styles:

- Tree Guard - rolls
- Preformed Guards
- Spray Shield

Tree Guard - rolls:

This range of nets comes in roll form, enabling flexibility when planting, this allows for different diameter guards. The net is usually cut and formed on site.

Preformed Guards:

A range of preformed guards offering the convenience of a finished product. The range comes in a variety of heights, diameters and mesh sizes.

Spray Shield

This type of guard has the added benefit of a solid 30 cm foil at the bottom offering protection against pesticides. With a strong mesh above giving the benefit of good ventilation and light access.

Manufacturing Excellence • Technical Expertise • Service • Quality

EXPO-NET Danmark A/S

We manufacture a broad range of plastic nets which are inert, easy to use and environmentally friendly. For over half a century our nets have been utilised by countless industries. We supply 100's of products from stock, in addition we work in close co-operation with our customers to create bespoke solutions.
